

# Seegene, Inc, Recruitment of Foreign Master / Doctoral Professionals

2012-12-04

1. Company: Seegene, Inc [www.seegene.com](http://www.seegene.com)

2. Address: Taewon building, 65-5 Bangyi-dong, Songpa-gu, Seoul 138-050

## 3. Who we are

### 1) Technology and business of Seegene.

Seegene, established in 2000 and listed on KOSDAQ in September, 2010, is a world's leading company of multiplex molecular diagnostics with unique technologies for multiple pathogen detection using PCR technique (Multiplex PCR). Seegene's multiple detection technologies, DPO™ (Dual Priming Oligonucleotide), READ™ (Real Amplicon Detection) and TOCE™, enable detection of multiple pathogens at once by overcoming the limitations of conventional PCR and Real-time PCR.

Developed with Seegene's specialized skills and know-how that have been accumulated over the years, the products have been touted as superior in multiplex testing efficiency and cost effectiveness for infectious diseases such as respiratory virus, sexually transmitted diseases, human papilloma virus, tuberculosis and drug-resistant tuberculosis, and hepatitis. These products are widely used in over 100 hospitals and clinical laboratories in Korea and exported to over 50 countries globally.

### 2) Who we are looking for

Seegene plans to pursue stronger and more organized country-specific localization through the US and European offices based on the new technology. Seegene wishes to lay the groundwork of international market expansion and country-specific localization by recruiting foreign professionals.

### 3) Best treatment in the Domestic bio-industry

Seegene orients the highest level of treatment for a Korean company and continues to establish and enforce policy to increase welfare benefits and educational opportunities. Also, we are committed to provide the best possible working environment and security to employees.

Seegene looks forward to recruit passionate and ambitious professionals, who will create future of molecular diagnostics to lead Biology of Korea and develop Korea to be the center of Molecular diagnostics with Seegene to grow as the Top 5 Global molecular diagnostic company.
